**Subject:** RE: "TF Vector Control (HARVEY)" Historical Naled PA information (PR/FL Zika)  
**Date:** Friday, September 8, 2017 8:08:52 AM

---

We developed materials during the Zika response, all of which should be on our web site.

One of the larger pieces we developed was on mosquito control, IPM, and discusses different methods of control, including larvicides and adulticides:

<https://www.epa.gov/mosquitocontrol/success-mosquito-control-integrated-approach>

Naled specific information is here: <https://www.epa.gov/mosquitocontrol/naled-mosquito-control>

And CDC has more here: <https://www.cdc.gov/zika/vector/aerial-spraying.html>

For PR materials, you should check CDC's zika site (<https://www.cdc.gov/zika/>) and look at the box on the right labeled "communications materials." We provided input and oversight on most of CDC's pesticide materials.

Hope this helps,

Susan.

Patricia and Martha: during the Zika emergency response in PR and FL, there was considerable talk of drafting talking points, draft public releases, etc. for the aerial spraying of insecticides containing Naled. Were those materials developed, and if so, are they available for share to TF Vector Control (Harvey) members? Thanks, Ken
